

I oppose media concentration!

We are writing to you today to comment on Docket No. 02-277. We are against the de-regulation of the current FCC rules that limit corporate control of the Media. If anything it should be the other way around.

Diversity and independence are the keystones of American Democracy. The regulations that are in place now prevent the monopoly of communications and distribution of information by corporate conglomerates. Independent and free press assure the expression of diverse viewpoints.
